We work for you.

In the event of a property loss, it is crucial to accurately inventory all damaged or destroyed items in order to receive the full value of your investment from the insurance company.

To receive full compensation, policyholders must provide extensive documentation when filing insurance claims. However, many focus on quick claim submission to expedite recovering their property, resulting in inadequate support and reduced settlements. This disadvantages policyholders but benefits insurers. Our highly experienced team at Claim Solutions manages the entire claim process to maximize your payout under policy provisions. Our adjusters, inventory specialists, appraisers, estimators, and business interruption experts conduct comprehensive assessments of all losses - building, inventory, equipment, fixtures, machinery, furniture and income. We obtain a fast, fair settlement so you can promptly make repairs and resume occupancy or business operations. Our meticulous documentation and presentation optimizes your insurance claim compensation.
