Technical Strengths

Tax Planning

Tax Planning strategies are crucial for individual and businesses. The 2018 Tax cut & Job act brings a major change to Tax laws. The passing of the law will have a major effect on you and your business in current and future years. By reviewing your tax position, we can help you choose the best option for you or your company. We can project your future tax liability before year-end, so there are no unpleasant surprises when your tax return is complete and ready to file. Our tax planning strategists will research and find and tax advantages available to you.

Real Estate Audit

Co-ops and condos have become a specialty for our firm. We have a decided edge on the rapidly expanding co-op and condo market. We use our experience and talents to bring the best possible perspective to the financial problems of co-ops and condos. Stockholders, creditors, and private investors often need assurance that the financial statements accurately represent the true financial position of a company.

Financial disclosure

Presenting a professional and attractive appearance for your company's financial statement is as important as determine that the information contained within is accurate and up-to-date. Our internal control procedures ensure that each financial statement issued has been thoroughly reviewed for content and design. By adhering to strict firm guidelines, we are able to avoid embarrassing mistakes that could delay the smooth running of your business.

Computer System

Computers and accounting software are required to record, store and analyze financial data. Computers are one of the greatest assets in today's business world, but the rapid development of the new software and equipment makes it difficult to determine what is best for your business. Our firm stays on top of this ever-changing technology. We are able to discuss your computer capabilities and guide you in the direction that will help you maintain your competitive edge. We can help you with which program to buy. We can also customize certain features to meet your needs.

Management consulting

Many businesses do not have the resources available to employ personnel with the varied expertise (i.e., marketing, finance, human resources) necessary in today's complex business environment. We fill that gap. As an extension of your executive team, our group of professional are available to assist you in making your operation more efficient and to help you realize a more profitable growth potential.
