

Dahua Technology USA brings high-value, total security solutions to the North American market by focusing on integrity and personal relationships to enhance the customer experience.

We're working hard to make Dahua the first name that comes to mind when you think of innovative video surveillance solutions.

AUTHORIZED DISTRIBUTORS

Dahua Technology USA sells products through a variety of authorized national and regional distributors in the United States. To verify whether a distributor is authorized, visit www.dahuasecurity.com/en/us, go to "Partners," and then "Authorized Distributors." For additional information, or if you are interested in becoming an authorized distributor of Dahua products, please email sales.usa@global.dahuatech.com.

DAHUA DEALER PROGRAM

From project registration, training and educational offerings to outstanding warranty and RMA capabilities, the Dahua Dealer Program is designed to give participants a competitive advantage in the industry. In addition to generous discounts, demo equipment discounts, rebates and other revenue-increasing opportunities, we also provide our dealers with sales, technical and marketing support to help expand their business. For more information about the Dahua Dealer Program please email dealers.usa@global.dahuatech.com.

DISCOVER THE DAHUA DIFFERENCE

 VIDEO SURVEILLANCE SOLUTIONS

Network 6MP Fixed IR Panoramic Multi-sensor Bullet Camera

6MP HD Vandal-proof IR Network Fisheye Camera

PANORAMIC CAMERAS

In environments that require broad coverage, panoramic cameras can do the job alone where several cameras would be needed otherwise. With high resolution sensors providing either a 180- or 360-degree view, blind spots are eliminated and detailed images are provided in both indoor and outdoor environments.

FISHEYE

Dahua's fisheye cameras allow for a 360-degree hemispherical image that can be dewarped in order to view individual elements separately. Easy to install on a ceiling or wall, they are well-suited for office buildings, parking garages, gas stations, and retail environments.

MULTI-SENSOR

Dahua's multi-sensor camera provides added flexibility for capturing wide area video surveillance. With three 2MP sensors working in tandem to create a comprehensive 180-degree overview, the camera can replace multiple single-sensor cameras—providing a higher return on investment. With the field of view being divided across the three sensors, adjustments can be made to each sensor for contrast and brightness, resulting in a crystal-clear panorama.

HDCVR 8-Channel Penta-brid DVR

HDCVI

Dahua delivers HD analog technology with our HDCVI line. HDCVI breathes new life into aging analog video surveillance systems, bringing HD video and IP-type functionality to long distance transmissions over coaxial cable. It's the highest resolution HD analog solution on the market. With economically-priced products for smaller applications and high-performing systems for more demanding installations, Dahua HDCVI solutions meet a broad range of budget and imaging requirements. The latest iteration, HDCVI 3.0, offers "penta-brid" compatibility with support for the five most popular industry standards—IP, CVI, Analog, AHD, and TVI—representing a streamlined open source solution that integrates with the most widely-used technologies on the market.

2MP Starlight Network Box Camera

STARLIGHT

For challenging low-light applications, Dahua's Starlight models offer best-in-class light sensitivity capturing color details in low light down to 0.005 lux. These cameras, available in box, bullet and dome-style housings, overcome challenging lighting conditions by using a judicious selection of optical parameters to balance light throughout the image process. The result is stunningly clear images in very dark environments.

Network 4K 30x PTZ IR Dome Camera

4K

4K Ultra HD provides up to four times higher resolution than standard 1080p, resulting in more details for live or forensic viewing even when zoomed-in. When paired with a 4K monitor, images are magnified in a 16:9 format to display crisp details. As a result, Dahua 4K cameras offer the precision and clarity required for an effective retrospective analysis when it comes to viewing video surveillance.

Network 6MP Vari-focal IR Bullet Camera

SMART H.265+

Smart H.265+ is Dahua's latest proprietary compression standard for the video surveillance industry. Reducing bit rates by 40%-50% over Smart H.264+, a higher level of video quality can be recorded and stored more efficiently. Reduction in noise and enhanced dynamic range are two additional benefits. Smart H.265+ also looks to the future, with the potential of supporting cameras with much higher megapixel counts than what are currently available today.
