

WE USE THE FINEST EQUIPMENT AVAILABLE ALONG WITH THE highest work standards.

As a result, your business or residential complex will receive the most thorough and effective air duct and vent cleaning available.

Our Techs Are Certifiably the Best in the Business

In our industry, certification matters. It signifies exceptional training. Duct Dudes is a proud member of the National Air Duct Cleaners Association, which has helped keep the duct cleaning industry honorable for the past three decades by demanding the highest standards. While some companies have one NADCA-trained tech on staff, we assign one to every single job.

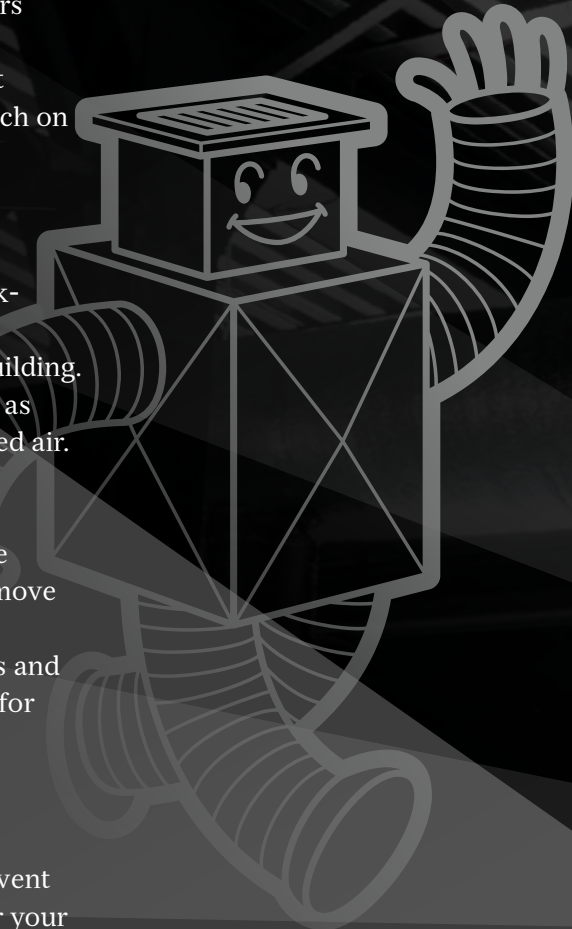

Our Equipment Is Top Notch

We use the most powerful vacuums in the industry. These truck-mounted HEPA-filtered vacuums can generate 16,000 CFM of negative pressure—strong enough to handle even the largest building. Plus, to ensure your ducts and vents are cleaned as thoroughly as possible, our high-powered vacuums use 200 PSI of compressed air.

We use EnviroCon to deodorize your ductwork and improve your air quality. This mild, safe deodorizer is registered with the Environmental Protection Agency. Its primary mission is to remove odors caused by mold, mildew and bacteria. It's unscented and doesn't use perfumes to mask or hide odors. Instead, it oxidizes and eliminates the cause of the odor. EnviroCon is completely safe for building occupants, including children and pets.

We Make It Easy

Want to set it and forget it? We can develop air duct and dryer vent cleaning maintenance schedules that are uniquely designed for your business or residential property. Call our team today to schedule a free consultation!

We're the Smart Solution FOR BUSINESS OWNERS, PROPERTY MANAGERS

Duct Dudes is the No. 1 air duct and dryer vent cleaning company in New York, New Jersey, Southwest Connecticut and Eastern Pennsylvania.

We specialize in duct and vent cleaning for businesses and large residential properties, including townhomes, condominiums, high-rises and apartment complexes.

For busy business owners and property managers who work with us, ensuring the air ducts and dryer vents in their buildings are being properly—and thoroughly—cleaned and maintained is hassle-free. We'll remove dust, dirt, hair, allergens, pollutants and more from ducts and vents using our powerful, high-tech equipment and state-of-the-art cleaning processes. We'll accommodate your schedule, working quickly and efficiently to be out of your space in no time at all.

We will help make sure you comply with all air duct and dryer vent cleaning regulations that apply in your state and community. We recommend you clean your ducts and vents every one to two years.

OUR SERVICES INCLUDE:

- Dryer vent cleanings
- Ductwork cleanings (vertical risers)
- Cleaning the “lungs” of your building (vents in bathrooms, lobbies, hallways and other common areas)
- Exterior building vent replacement

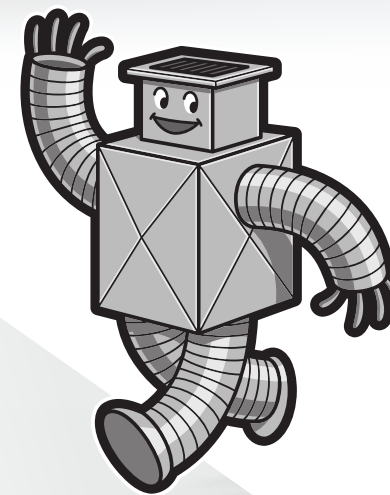

Air Duct CLEANING

You probably already know that indoor air is three to five times dirtier than outdoor air, according to the Environmental Protection Agency.

That's why it's so important to have the air ducts in your commercial building or large residential property cleaned thoroughly and professionally.

Up to 40 pounds of dust can build up yearly in 1,000 square feet of space, so you can imagine the amount of garbage that flows through your HVAC system and back into your building. Dander, dust, bacteria, viruses and chemicals get recirculated about five to seven times each day. Over time, this junk builds up in your ductwork. Dirty ducts can contribute to health problems, causing or aggravating symptoms of respiratory conditions, autoimmune disorders, environmental allergies and more.

For businesses, dirty ducts don't just affect the health of workers and customers. They also cause heating and cooling bills to skyrocket because a dirty system does not operate at peak efficiency. Duct Dudes will deliver the cleanest, freshest, healthiest environment for your business—and we'll do it with minimal disruption to your day-to-day operations.

Dryer Vent CLEANING

Dryer vent cleaning is serious business.

Here's why: Each year, firefighters across the country respond to roughly 2,900 home clothes dryer fires that cause an estimated five deaths, 100 injuries and \$35 million in property loss. Failure to clean the dryer vent is the leading cause of these fires. Businesses are at high risk, too. When lint builds up or clogs your dryer duct, your business or residential complex is at significant risk for fire. Don't jeopardize the safety of your tenants, employees, customers, patients or anyone else.

We remove lint, animal nests, small articles of clothing and more from dryer vents. Clean dryer vents keep your dryer system functioning efficiently and affordably and reduce dryer downtime, saving you inconvenience and money.

Our equipment can handle even the trickiest dryer vent cleaning challenge. And while a lot of companies claim to provide similar services, it's been our experience that they don't clean the full length of the dryer vent run. This is a huge oversight.

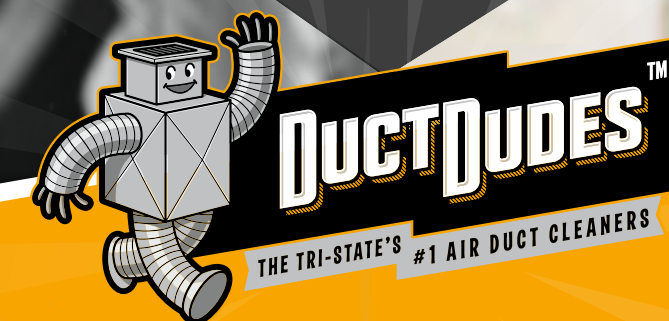

We'll also examine your exterior building vents, which are often made of plastic that deteriorates over time, and replace them when necessary to provide you with the best protection. We offer stronger, sturdy options, including *The Defender*, which is made of powder-coated steel bars that keep animals out but allow lint to pass through.

Our outstanding dryer vent cleaning services will improve your business environment and your bottom line by:

- Reducing the risk of dryer vent fires
- Cutting your energy bills
- Improving drying times
- Cutting maintenance/repair bills
- Increasing the lifespan of your dryer
