

TRUST **THE GUARD.**

SAFETY, SECURITY AND STORAGE SINCE 1962

PRODUCT CATALOG 2019

IT'S ALL ABOUT TRUST

To us, the word trust has multiple meanings. Most obvious, of course, is the trust offered by our safety, security and storage solutions. People depend on our products to protect their property and ensure their personal safety, so earning and keeping our customers' trust is imperative.

Trust, however, always starts internally; on the floor, in our office, between departments and colleagues. Here at Folding Guard®, trust leads us to accomplish great things.

TRUE TO OUR MISSION SINCE 1962

Folding Guard® was founded more than half a century ago in Chicago and has been a fixture of the industrial community ever since. For decades, we have stayed true to our mission: to continuously improve our products and processes to make the right level of safety, security and storage available to each and every customer.

Our products may be our pride and joy, but our customers are our number one priority. Caring for people has become a natural part of our DNA through decades of dedicated work.

Businesses of all kinds, in every part of the US, are using Folding Guard® solutions to support the welfare of employees and to ensure that everyday work runs as smoothly as possible. That's why we believe there is no time to waste when it comes to making workplaces safe and secure.

We take pride in delivering on time and challenging ourselves to exceed the expectations of our customers at every step.

In our plant, we've found that a mix of human skills and modern technology is the key to success. This results in efficient production, a high level of precision, and quality control down to the smallest details.

Since 2016, Folding Guard® has been a part of the Troax Group — one of the international leaders in industrial safety. Troax has been in this business as long as we have — and we have a common view of the future: there are always better solutions in safety, security and storage waiting out there. By working together and letting trust be our guiding light, we will find them.

STEEL GOING STRONG

Steel played an essential role in this urban growth of unprecedented proportions. Steelmaking had just been rationalized, and the innovative use of steel frames for buildings helped the city of Chicago to aim ever higher — eventually creating the world's first skyscrapers.

Folding Guard® was founded in 1962, when Chicago's steel industry was still at its peak. In our hands, steel would once again show its versatility and usefulness — first as sturdy folding gates, then as protective wire products. Since then we have survived and thrived through five decades of more complex business structures, tougher competition and higher demands. No challenge has been too tough to overcome.

Today, steel continues to be the strong framework for Folding Guard®. But the commitment, the pride and the trust is all about people — our customers, who return to us year after year for all their safety, security and storage needs, and our dedicated employees, who take pride in their work each and every day.

It took a special kind of commitment to make this happen. At the dawn of the 20th century, Chicago was recognized as one of the world's five largest cities. Less than one hundred years earlier, settlement in the area had consisted of little more than a trading post on the river bank.

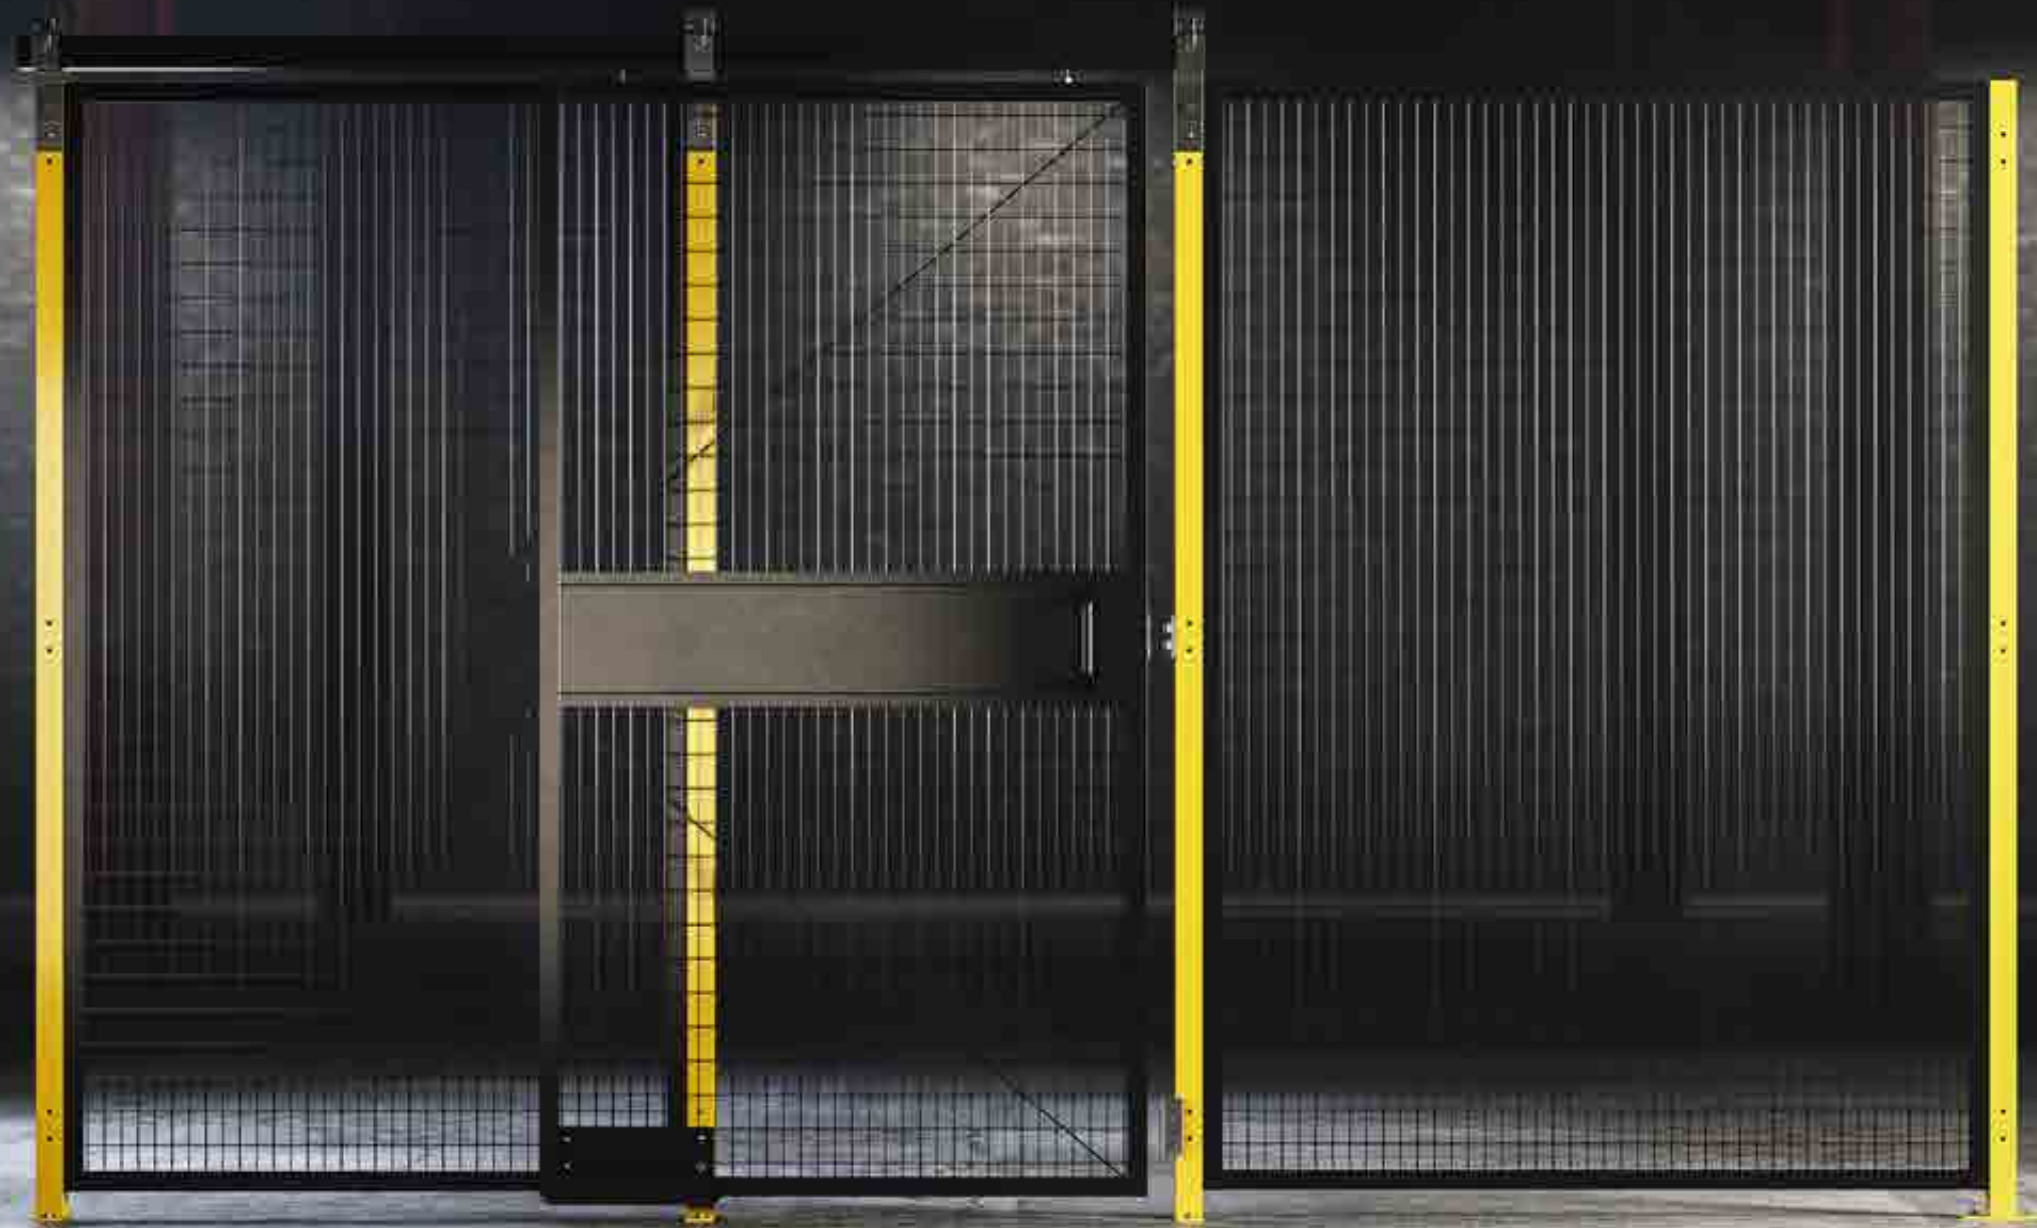

ALWAYS ON THE WIRE

Real people are essential to the production of all safety, security and storage solutions from Folding Guard®. Human hands, eyes and minds can never be fully replaced by machines and automation in our business. The reliability expected from the end result is just too important.

SAFETY

Our machine guarding systems help prevent accidents around robots and automated equipment in industrial environments.

SAF-T-FENCE® MACHINE GUARDING

SAF-T-FENCE® MACHINE GUARDING

PROTECT YOUR WORKERS FROM HARMFUL ACCIDENTS AND COSTLY FINES

- ▶ **STRUCTURAL INTEGRITY**
Our framed welded mesh that bolts into our posts gives Saf-T-Fence® superior strength and stability.
- ▶ **MODULAR SYSTEM**
The Saf-T-Fence® system consists of standard panels available in a variety of widths and heights.
- ▶ **IN STOCK**
We keep a large stock of our standard components in-house to ensure quick shipping for your urgent safety needs.
- ▶ **MEETS OSHA & ISO SAFETY STANDARDS**
The Saf-T-Fence® system meets all relevant ISO, OSHA, ANSI/RIA and CSA safety standards.

Maintaining the safety of your employees around machinery is paramount to the success of your business. Saf-T-Fence® Machine Guarding from Folding Guard not only protects your staff, but it can also help lower your cost of doing business by maintaining productivity and reducing downtime.

Our modular system consists of three system heights, multiple styles of doors and over 30 pre-fabricated wire mesh panel sizes. All pieces assemble and install precisely and easily. You'll enjoy worker safety, less downtime and compliance with federal safety regulations when you use Saf-T-Fence® to fulfill all of your machine guarding needs.

Slide door with snap lock

The sturdy 6" x 2" footplate makes the system extremely stable

The angle panel kit can join two panels at any angle

VERSA GUARD™ MACHINE GUARDING

VERSA GUARD™ MACHINE GUARDING

THE MACHINE GUARDING SYSTEM THAT BLENDS FUNCTION, FLEXIBILITY AND COST-FRIENDLINESS

STURDY SYSTEM

With 90 degree bends at the top and bottom of all panels, the rigidity of this system is unparalleled compared with other frameless systems.

UNSURPASSED ADJUSTABILITY

Panels can easily be adapted before delivery or on-site, and it is easy to make cut-outs without any need for welding.

QUICK & EASY ASSEMBLY

All mounting hardware and floor anchors are included and posts are predrilled for expedited assembly.

EASILY COMBINED WITH OUR SAF-T-FENCE® SYSTEM

Can be used where risk of impact is low and seamlessly blended to our Saf-T-Fence® system in higher-risk sections.

Our Frameless Machine Guarding system is an attractive guarding solution that provides great visibility around any machine. Welded at each intersection in its tight 1 ¼" x 2 ½" grid pattern, this system can be installed as close to 8" to hazard (per ISO 13857). This allows you to install much closer than the conventional 2" x 2" grid pattern, which cannot be installed closer than 33 ½". With this extra 25 ½" in distance, you can more efficiently utilize your floor space.

With simple mounting clips, this frameless system is easily reconfigurable, flexible and installs 25% faster than substitutes by employing fewer parts and utilizing self-tapping screws.

Easy to install with clip and Tek screws

A 6" x 6" footplate is available for areas that need extra support

DROP-N-LOCK® BRACKET SYSTEM

DROP-N-LOCK® BRACKET SYSTEM

A FAST AND FLEXIBLE TWO-POINT FASTENING SYSTEM WITH QUICK ACCESS FOR MAINTENANCE

- ▶ **FAST INSTALL**
With very few components, Drop-N-Lock® can be quickly and easily installed.
- ▶ **HASSLE-FREE REPAIR & MAINTENANCE**
Drop-N-Lock® is easily dismantled with one tool, allowing quick access for repairs and maintenance.
- ▶ **IN STOCK**
We keep a large stock of our standard components in-house to ensure quick shipping for your urgent safety needs.
- ▶ **MEETS SAFETY STANDARDS**
The Drop-N-Lock® system meets all relevant OSHA, ANSI/RIA CSA and ISO safety standards.

Drop-N-Lock® provides versatility and ease for the installation and maintenance of Saf-T-Fence® Machine Guarding. This easy-to-use bracket system allows for quick configuration and removal, substantially saving on installation and maintenance costs. Offered in a wide array of panel sizes, door options and locking hardware, Drop-N-Lock® can cover nearly every requirement.

To install the Drop-N-Lock® Bracket System, simply drop the panels into the post brackets and lock it into place with simple tightening. When maintenance workers need access, you can quickly remove the panel from the posts and the bracket system will stay attached to prevent any misplaced hardware.

Panels easily lock in place with bracket Use two brackets for corner installation

SECURITY

Our partitions and lockers secure valuables with minimal configuration in both industrial and commercial environments.

SAF-T-FENCE® PARTITIONS

SAF-T-FENCE® PARTITIONS

KEEP YOUR INVENTORY SAFE WITH AN EASY-TO-ASSEMBLE PARTITIONING SYSTEM

- ▶ **STRUCTURAL INTEGRITY**
Our framed welded mesh that bolts into our posts gives Saf-T-Fence® superior strength and stability.
- ▶ **MODULAR SYSTEM**
The Saf-T-Fence® system consists of standard panels available in a variety of widths and heights.
- ▶ **IN STOCK**
We keep a large stock of our standard components in-house to ensure quick shipping for your urgent security needs.
- ▶ **MULTIPLE LOCK OPTIONS**
With doors available in multiple configurations, we're able to find the right solution for your project. If your required option doesn't show here, your local sales representative will work with you to find the best solution.

You don't have to build permanent walls to control access to your inventory, tools, supplies or documents – Saf-T-Fence® Partitions are a great, low-cost alternative! Our modular partitioning system provides security, structural strength and flexibility, all while allowing an unobstructed view of your property. The mesh pattern also allows for full air and light circulation with no change to your lighting or heating systems required.

Our modular system can be built in various heights by pairing our standard height panels in combination with multiple styles of doors. All pieces in the Saf-T-Fence® Partitioning system assemble and install with precision and ease.

QWIK-FENCE® PARTITIONS

QWIK-FENCE® PARTITIONS

GALVANIZED WIRE WELDED IN A GRID PATTERN CREATES AN ATTRACTIVE AND SECURE SYSTEM FOR SEPARATING SPACES

- ▶ **UNSURPASSED ADJUSTABILITY**
The Qwik-Fence® System can be easily adapted on-site to meet your specific needs.
- ▶ **IN STOCK**
We keep a large stock of our standard components in-house to ensure quick shipping for your urgent security needs.
- ▶ **PRE-ENGINEERED ROOMS**
Available in multiple configurations, the Qwik-Fence® system ships pre-packaged, making it quick to set up and easy to relocate.

Qwik-Fence® Welded Wire Partitions are an extremely tough and attractive system for separating and securing any space. Welded at each intersection—over 500 welds in a 4' x 8' panel—this wire mesh partition is substantially stronger than woven wire alternatives.

True to their name, Qwik-Fence® Partitions install 25% faster than substitutes by employing fewer parts and utilizing self-tapping screws. The partitions are easily reconfigurable, flexible and the galvanized finish will keep the system looking new for years to come.

Multiple locking options are available (cylinder lock shown)

All slide doors come with sturdy tracks

WOV-N-WIRE® PARTITIONS

WOV-N-WIRE® PARTITIONS

DURABLE, TRADITIONAL AND COMPETITIVELY-PRICED FENCING FOR SEPARATING AND SECURING AREAS

- ▶ **PRE-DESIGNED ROOM KITS**
Room kits are economical, easy to install and available in a variety of configurations — all of which include a sliding door.
- ▶ **MODULAR SYSTEM**
The Wov-N-Wire® system consists of standard panels available in a variety of widths and heights.
- ▶ **TRADITIONAL**
This is the option if you have an existing, older install that needs to be matched.

Wov-N-Wire® Partitions are the traditional enclosure system specified by architects and contractors. The 10-gauge steel wire is woven to create a durable, high-quality system that can be designed to any height up to 25'.

With the ability to be configured into a 2-, 3-, or 4-sided room, Wov-N-Wire® Partitions can be used for a variety of applications, such as enclosing work areas or creating secure storage cages and stock rooms. The rooms can also be configured to include a roof or a service window.

Sturdy 6" x 2" footplate makes the system extremely stable

Corner post mounts flush with wall line to eliminate trip hazard

STOR-MORE® LOSS PREVENTION CABINET

STOR-MORE® LOSS PREVENTION CABINET

SLEEK CABINETS TO SECURE YOUR HIGH-VALUE PRODUCTS

- ▶ **STRUCTURAL INTEGRITY**
Framed welded mesh is used all around the cabinet and the corners are designed with a sturdy 2" x 2" tubing to provide excellent strength and stability.
- ▶ **OPTION TO SHIP PRE-ASSEMBLED**
When you order a pre-assembled cabinet all you have to do is bolt it to the floor!
- ▶ **COMES WITH TWO SHELF LEVELS**
Each shelf level can support up to 200 lbs. UDL and additional shelves can be easily added.
- ▶ **VISIBILITY**
Folding Guard's mesh design allows for a quick visual inspection of valuable items.

Standalone Stor-More® Loss Prevention Cabinets are designed to secure small- to medium-sized, high-value products in any location—on the sales floor, in the back room or in the receiving area. The open mesh design of the cabinet allows for a quick visual inspection of contents and does not obstruct sprinkler system performance.

Made from 10-gauge welded wire mesh panels on a 2" x 2" frame, constructed of 14-gauge tube, Stor-More® Loss Prevention Cabinets are extremely sturdy and durable. Hinged doors include a built-in cylinder lock and all lockers include two levels of shelves in 4-gauge welded wire. More shelves can be added depending on your needs.

STOR-MORE® DISPATCHER LOCKER

STOR-MORE® DISPATCHER LOCKER

INDIVIDUALLY-LOCKED COMPARTMENTS FOR SERVICE TEAM PICK-UPS OR EMPLOYEE STORAGE

- ▶ **STRUCTURAL INTEGRITY**
Our framed welded mesh is used all around the locker to provide exceptional strength and stability.
- ▶ **OPTION TO SHIP PRE-ASSEMBLED**
When you order a pre-assembled cabinet all you have to do is bolt it to the floor!
- ▶ **MULTIPLE TIER OPTIONS AVAILABLE**
With a variety of options available, you can choose the design that best fits your needs.
- ▶ **OPTIONAL BACK DOOR**
Back door allows for fast and secure distribution of work orders for your dispatch team and employees.

Stor-More® Dispatcher Lockers feature individually-locked compartments, making them well-suited for a wide variety of operations. With the option to add a rear door, dispatcher lockers can be especially useful where service employees need to pick up daily work orders and equipment.

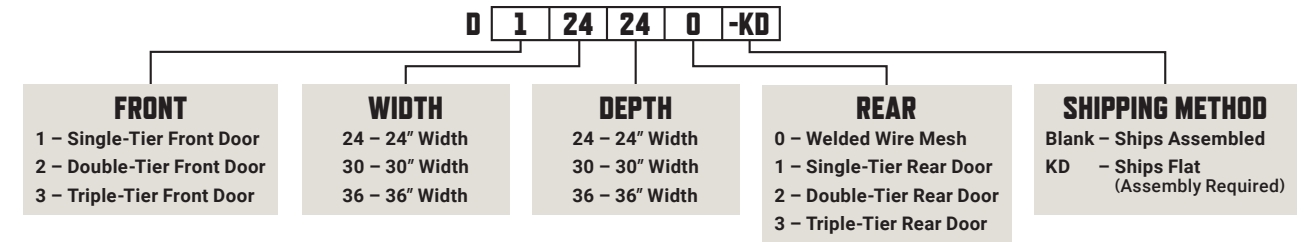

Available in almost every imaginable combination – single- to triple-tier, front-and-back doors and 90 different standard sizes – the Stor-More® Dispatcher Locker can be configured to meet your needs.

Shelves can be added to make the most of your storage space

All Dispatcher Lockers come with a padlock hasp for increased security

QWIK-FENCE® PALLET RACK BACKING

QWIK-FENCE® PALLET RACK BACKING

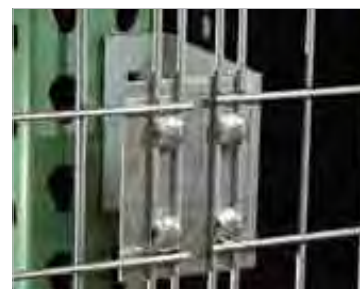

PREVENT OBJECTS FROM FALLING OFF OF OVERHEAD STORAGE SYSTEMS

- ▶ **LIGHTWEIGHT**
The frameless design makes our Qwik-Fence® Pallet Rack Backing lightweight and easy to install.
- ▶ **WELDED MESH**
Welded mesh provides a safer working environment than netting.
- ▶ **STACKABLE**
The sky is the limit! You can add panel after panel to achieve your required screen height.
- ▶ **IN STOCK**
We keep a large stock of the most common bay widths in-house to ensure quick shipping for your urgent needs.

The Qwik-Fence® Pallet Rack Backing System is designed to secure an existing pallet rack or bulk rack. This all-steel system provides great fall-down protection for all employees and visitors. The open mesh design allows for quick visual inspection and will not obstruct sprinkler system performance.

With multiple assembly options, the Qwik-Fence® system can be mounted flush or with a variety of stand-off brackets and is easily assembled with all hardware included. The galvanized finish will keep your system looking new for years to come.

Offset brackets are available in different distances

Adjustable extension kit allows you to extend panels past uprights

STORAGE

Our storage lockers come in multiple sizes and configurations so you can store to anything from military equipment to tenants' personal belongings.

STOR-MORE® TENANT STORAGE LOCKER FRAMED WELDED WIRE

STOR-MORE® TENANT STORAGE LOCKER FRAMED WELDED WIRE

PREMIUM LOCKERS FOR SECURE STORAGE OF TENANTS' PERSONAL ITEMS

- ▶ **EASY INSTALL**
Component panels are pre-punched and slotted for easy assembly and relocation using standard hand tools. Units can either be bolted to the floor or to the wall.
- ▶ **FLEXIBLE CONFIGURATION**
Lockers are available in single-, double- and triple-tier configurations, and can also be combined to fit your needs.
- ▶ **CAD SUPPORT**
We can support you with CAD drawings to show where our lockers can be located within your space.

Stor-More® Framed Welded Wire Tenant Storage Lockers provide sturdy and secure storage with a sleek design. Their heavy-duty construction and powder coated finish ensure years of maintenance-free performance.

The modular design of these lockers, along with their pre-punched and slotted panels, allows for easy planning, installation and relocation. Available in six standard sizes ranging from 3' x 3' x 90" to 4' x 5' x 90", Stor-More® Framed Welded Wire Tenant Storage Lockers can be configured to meet your unique needs.

A padlock hasp is included on all lockers for increased security

All hinges are welded for extra security

CONFIGURATION INSTRUCTIONS

Modular design makes Stor-More® lockers easy to plan, install and relocate. Available in single-, double- and triple-tier units, and can be combined. Begin with starter unit, single-, double- or triple-tier and complete row with add-on units.

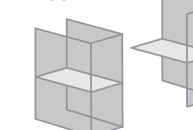

SINGLE TIER

Starter
1 single-tier door
2 end-run panels

Add-On
1 single-tier door
1 side panel

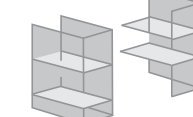

DOUBLE TIER

Starter
1 double-tier door
2 end-run panels
1 shelf

Add-On
1 double-tier door
2 side panels
1 shelf

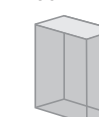

TRIPLE TIER

Starter
1 triple-tier door
2 end-run panels
2 shelves

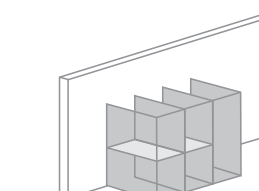

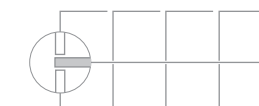

Add-On
1 triple-tier door
1 side panel
2 shelves

COMPLETE UNIT

Starter
1 triple-tier door
2 end-run panels
1 tip panel
1 back panel

Tier(s)
0-2 shelves (specify)

Single-row locker configurations installed against an existing wall do not require optional back panels. Double-row locker configurations share common back panels.

STOR-MORE® TENANT STORAGE LOCKER GALVANIZED WELDED WIRE

STOR-MORE® TENANT STORAGE LOCKER GALVANIZED WELDED WIRE

STURDY LOCKERS FOR SAFE AND SECURE APARTMENT OR OFFICE STORAGE

▶ STRUCTURAL INTEGRITY

Composed of heavy-gauge welded wire mesh, our lockers are extremely sturdy and secure.

▶ FLEXIBLE CONFIGURATION

Lockers are available in single-, double- and triple-tier configurations, and can also be combined to fit your needs.

▶ CAD SUPPORT

We can support you with CAD drawings to show where our lockers can be located within your space.

▶ EASY INSTALL

Component panels are pre-punched and slotted for easy assembly and relocation using standard hand tools. Units can either be bolted to the floor or to the wall.

All-galvanized steel Stor-More® Tenant Storage Lockers provide sturdy, secure storage for apartment, condominium and business tenants. Their galvanized finish and heavy-duty construction ensure years of maintenance-free performance.

A modular design makes Stor-More® Galvanized Tenant Storage Lockers easy to plan, install and relocate. Available in six standard sizes ranging from 3' x 3' x 90" to 4' x 5' x 90", our lockers can be configured to meet your unique needs.

All lockers come with a padlock hasp for increased security

Shelves can be added to make the most of your storage space

SAF-T-STOR® CYLINDER CABINET

SAF-T-STOR® CYLINDER CABINET

PROTECT COMPRESSED GAS CYLINDER TANKS FROM DAMAGE, THEFT & UNAUTHORIZED ACCESS

- ▶ **GALVANIZED FINISH**
The galvanized finish makes our Saf-T-Stor® Cylinder Cabinets suitable for any industrial environment.
- ▶ **MULTIPLE SIZES AVAILABLE**
With a wide variety of sizes, you can choose the Cylinder Cabinet that best fits your needs.
- ▶ **EXCEEDS MARKET REQUIREMENTS**
All Folding Guard Cylinder Cabinets exceed OSHA 1910.110 requirements and NFP standard 58-79.
- ▶ **EASY ASSEMBLY**
All components are slotted, making assembly quick and easy using only common hand tools.

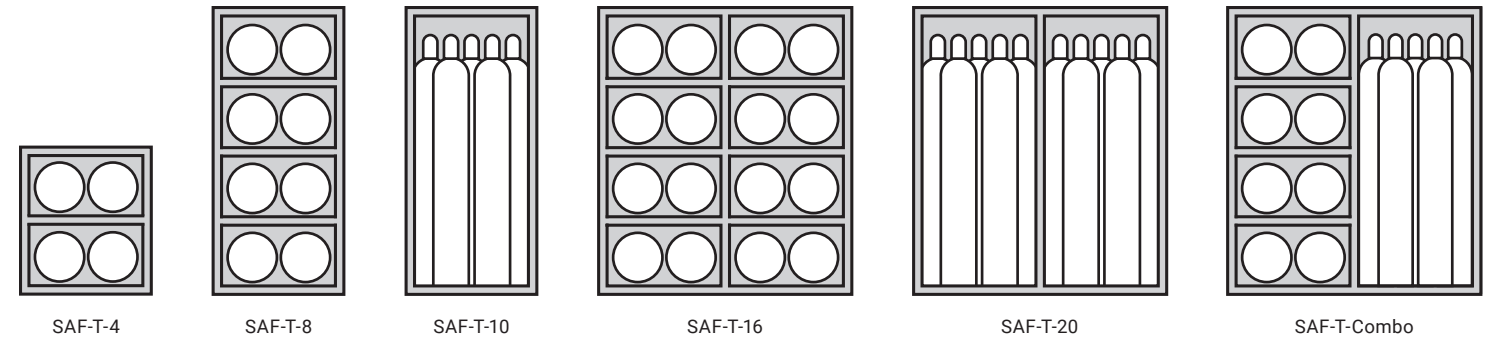

Saf-T-Stor® Cylinder Cabinets provide compact storage for compressed gas cylinder tanks while protecting them from damage, theft and unauthorized access. You can rest assured that your tanks will be safe as our cabinets exceed OSHA 1910.110 requirements and NFP standard 58-79 and all purchases come with an OSHA-compliant "Danger Flammable Material" sign included.

Whether you need to store your tanks inside or outside, the galvanized finish of Saf-T-Stor® Cylinder Cabinets can withstand the elements while resisting rust and corrosion. With a wide variety of models—including horizontal, vertical and combination storage configurations—you can design a cabinet to fit your exact needs.

18-gauge, galvanized steel sloping roof sheds water and ice

Shelves help to keep your gas cylinders from moving around the cabinet

STOR-MORE® TA-50 MILITARY LOCKER

STOR-MORE® TA-50 MILITARY LOCKER

SECURE STORAGE FOR MILITARY EQUIPMENT & GEAR

- ▶ **STRUCTURAL INTEGRITY**
Constructed of heavy-gauge steel, our TA-50 lockers can withstand years of heavy use.
- ▶ **MILITARY DESIGN**
Meets U.S. Military requirements for securing personnel's equipment and gear.
- ▶ **VISIBILITY**
Our mesh design allows for a quick visual inspection of content.
- ▶ **EASY ASSEMBLY**
All hardware is included and all components are welded and pre-punched, making assembly quick and easy.

Our TA-50 Military Lockers provide secure storage of personnel equipment and gear. The open mesh design allows for both quick visual inspection and ventilation. Both models are constructed of heavy-gauge steel to withstand years of heavy use. Both models feature full-height doors with a three-point locking system and a built-in padlock hasp. With this system, the latching rod engages the top and bottom edges of the door frame, while a center latch engages the door jamb, enabling doors to latch on three sides.

The key differences between these two models are the backing and door type—the Expanded Metal model offers a solid back panel and bi-parting hinge doors, while the Framed Welded Wire model has an open mesh back and a single hinged door.

Framed Welded Wire Locker

Expanded Metal model offers a hinge pair door

Both models have full-height doors with a three-point locking system
