

BUILDING INTERIORS GROUP

Interior design & project coordination
for your building interior space
transformations.

Do it Right. Once. Beautifully.

When your building needs fresh interior design, partner with us for artfully conceived lobbies, hallways and amenity spaces.

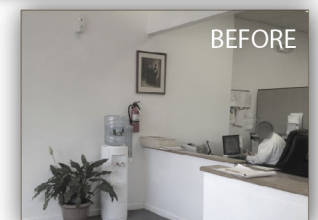

You need a team that works closely with yours, orchestrating the myriad details needed to bring to life a superlative design vision for your building's shared spaces. You'll also need to vet feasibility issues and plan out financial considerations before you start fleshing out a design concept. Then, with a terrific design idea in place, you'll need to build consensus among shareholders, owners and other stakeholders before hiring contractors, purchasing materials and, at long last, getting on with the installation.

It's a lot. We know.

Our highly experienced professional team will guide you through every phase, streamlining the entire project design and implementation process.

TRANSFORMATIONS

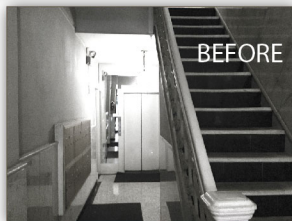

PROFESSIONAL

JQL Building Interiors Group has a strong 15-year record working with clients to design compelling people-centric spaces. Our top-notch customized design solutions evolve from a comprehensive analysis and understanding of each project's functional, aesthetic, financial and logistical challenges.

SERVICES

Our design service packages are customized to suit the specifics of each project:

- Full-service encompassing all project phases
- Pre-project consulting, planning & budget
- Design development & specifications
- Collaboration with other project professionals
- Project implementation coordination
- Materials, finishes and fixtures specifications
- Art and accessories selection

BEYOND THE LOBBY

Lobbies are more than entranceways. They define the quality and character of a building, providing an "Aha!" moment for all those who enter and invite people graciously toward homes and offices, mailrooms, community rooms, and other amenity spaces. The ability to address these interior spaces as an artfully integrated whole is essential to gracious living and augmented property values.

THE SPACE YOU HAVE

A hallmark of outstanding interior design is making the most of the space you have. Not every building has expansive areas to work with or the ability to build from scratch. Creating a welcoming experience is the epitome of great design—even when working with a small or unusual space or integrating existing elements.

About Us

JQL Building Interiors Group partners with co-op and condo boards, property managers, real estate professionals and stakeholders of multi-family buildings to provide superlative interior design and project coordination for lobbies, hallways, amenity spaces, model units, and more.

Our design group is led by ASID Professional designer Jacqueline Hosford, whose deep experience in interior design and residential construction project management drives all of our work.

Facility with the aesthetic and technical facets of the design business, along with a philosophy of mindfulness and care in what we do, ensure that well-conceived design goes hand-in-hand with quality of process and execution.

We measure success by how completely our installed designs address the lifestyle and functional needs of all the people who live and work in your building spaces.

This is our commitment to you.
