

MAX SPACE

STORAGE

CUSTOM ON-SITE TENANT
STORAGE SOLUTIONS

OUR PROCESS

for indoor and outdoor on-site storage

Many multi-family properties have unused space in basements, garages, parking lots and other areas. We take that space and transform it into revenue producing resident storage units, creating a simple, risk free way to monetize previous “dead space”.

THE ASSESMENT

We will come down to assess the available space and create a no obligation custom layout which best suits the specific building's storage needs.

THE INSTALL

Our team of licensed and insured professionals will come down to your building and fully install the storage units, turnkey and ready to be rented.

THE OPERATION

Max Space Storage will operate and manage the entire storage facility. We will take care of billing, security, insurance, upkeep and operations of all of the units.

THE REVENUE

On-Site Storage Units helps you tap into a brand new, no-risk revenue stream with zero capital expenditures.

THE AMENITY

On Site units gives you the opportunity to offer tenants easy access to self-storage, creating a more robust demand for rental units, higher rates of occupancy and higher rents.
