

# NYC IS LEADING THE WAY IN CARBON REDUCTION EFFORTS

## ABOUT

### THE CARBON REDUCTION WORKSHOP SERIES

The Carbon Reduction Workshop Series is a hands-on series focused on improving NYC commercial building carbon emissions by teaching you how to identify your emissions targets, set building performance goals, develop a multi-year retrofit plan and evaluate available financing options.

Crash Course  
on NYC  
Building  
Energy  
Laws

Local Law 97 Workshop

Your **Emissions**  
and Plan

Local Law 97 Workshop

Your Project Team  
and Financing

Benchmarking, Energy grades, Energy Audits, Lighting / sub-metering, Limits on GHG emissions, Energy conservation code, Solar power and green roofs.

Identify your carbon emissions targets, set feasible reduction goals and develop a plan to make decisions about Deep Energy Retrofits.

Explore and evaluate available financing options to then draft and manage a multi-year Deep Energy Retrofit Plan
