WHY
RAEL
FIRE PROTECTION SERVICES?

RAEL Fire Protection Services has been trusted by NYC's most iconic and demanding locations for over 80 years.

From designing and building the most robust and sophisticated fire protection systems in the world to basic maintenance and inspection services, RAEL provides our clients with the peace of mind they demand.

Our technology enhanced equipment tagging program provides unparalleled, real-time visibility into your equipment portfolio and ensures that you're producing reports in compliance with the NFPA 25 fire code.

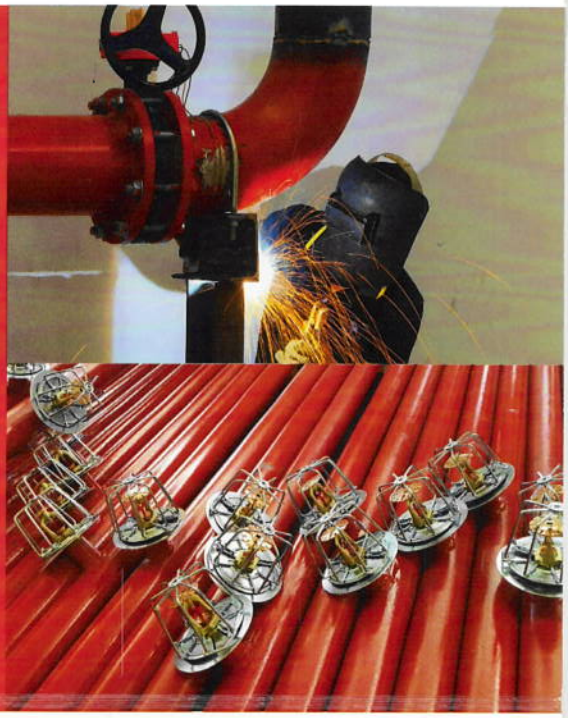
- FDNY VIOLATIONS
- FIRE EXTINGUISHERS

FIRE EXTINGUISHER SALES & SERVICE



OUR TECHNOLOGY

At the heart of RAEL Fire Protection Services is our **RAEL-REDi℠ Equipment Tagging Program.** (Readable Equipment Data Interface)

The RAEL-REDi program combines NFC Tag technology and a cloud-based platform to add a **unique and secure digital identity to every sprinkler valve and every fire extinguisher** in every building we service.

Equipment tags, when tapped, will send equipment data and inspection history, to our authorized field service technician's mobile device.

Our technicians, as well as your staff, can initiate various actions from these tags including creating a service request.

Are you RAEL-REDi?
