WE HELP OUR CUSTOMERS...

INSULATION IS CARBON NEGATIVE!

Insulation Solutions: custom, removable & reusable insulation jackets, blankets + fixed cut-to-length pipe solutions

PRODUCTS

Hot Jackets

Thermaxx Hot Jackets save money and improve workplace comfort.

Antifreeze Jackets

Anti-Freeze & Outdoor Insulation Jackets prevent freezing and can accommodate heating elements for extreme conditions.

Cold Jackets

Thermaxx Cold Insulation Jackets keep components and pipes cold, saving energy and reducing condensation-related issues.

Cryogenic Jackets

Anti-Freeze & Outdoor Insulation Jackets prevent freezing and can accommodate heating elements for extreme conditions.

Weathermaxx Jackets

Protect your exposed machinery with our Weathermaxx Jackets. Keep your outdoor equipment safe from the elements and extend its lifecycle.

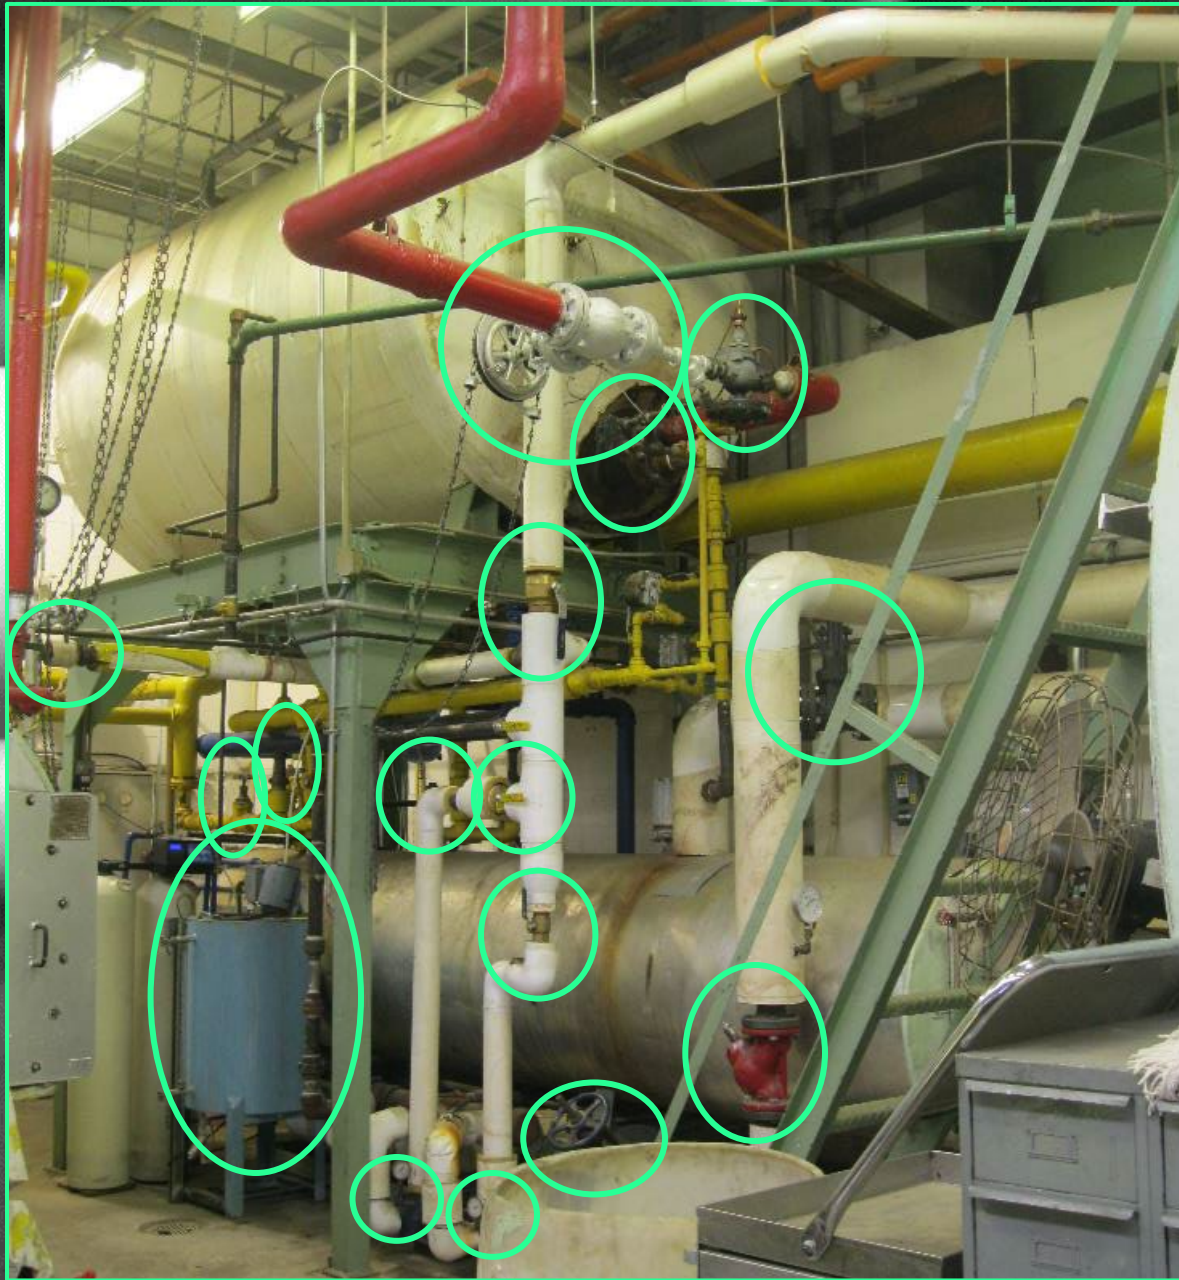

Acoustic Jackets

When noisy equipment is a problem, removable Acoustic Jackets may be the solution.

Smart Jackets

Our patented revolutionary new insulation cover featuring a built-in wireless temperature monitoring system for steam components.

A TYPICAL FACILITY

Has A Multitude of
Insulation Needs

*Where might your facility be
losing heat, energy, and
money?*

THERMAXX

PRODUCTION

SYNC TO CLOUD

- Custom, proprietary, iOS app
- Efficient workflow throughout process

TRACK & MANAGE ASSETS

- Scan qr codes on tags throughout lifecycle
- Customizable portal
- View and manage assets from anywhere

SLATE Pages

USE SLATES TAGS, APP AND PORTAL FOR:

- Insulation and Asset Project Management
- O&M
- Steam trap survey
- Tagging and cataloging equipment
- Track inspections
- Immediate remote access to asset tracking and management
- Simple and easy access to asset data (including photos of components)
- Customizable data tracking
- Option to view assets using a map view or as a list
- Durable laser etched anodized aluminum tags will stand the test of time or custom stickers offer incredible ease of use

Slate™ Tags

Our proprietary Slate™ tags allow you to track insulation blankets throughout their lifecycle, including logging removals and component maintenance.

Slate™ tags can also be used without jackets to tag other components, such as valves, steam traps, and fire extinguishers,

Insulation Audit

To Save \$ + Lower Carbon Emissions

Benefits of Energy Incentives:

Many energy customers pay a small fee that is earmarked for energy-efficient projects. Insulation for heating and water systems can qualify for utility incentives, which can significantly reduce the out-of-pocket cost for your customers.

The Thermaxx Incentive Department can assist you by streamlining the paperwork and coordinating the incentive process between you, the customer, and the utility. We have established relationships with key players that allow us to navigate complex applications and projects easily.

Our knowledge and efforts maximize the available incentives for your customers, allowing you to focus on your work and potentially bid on projects at a more accurate cost. This means that the out-of-pocket costs for your customer may be the same or lower, while your profit can increase with the incentive payout.

mpolicarpio@thermaxx.es

Made in West Haven, CT

If you are missing insulation on your mechanicals, you are missing out on savings! Increase your operating margins with a heat loss survey and rebate application assistance from Thermaxx.

Heat Loss Survey/Quote with ROI

We perform a comprehensive insulation audit of your mechanical systems and quantify the heat loss, annual energy savings, and project ROI.

Measurements/Design

Our experienced professionals take exact measurements of each component, then design custom insulation jackets to ensure a proper fit.

Fabrication/Installation

We craft each jacket using high-quality materials and (optionally) install them on each component where they instantly start providing savings.

Identify Incentives (As Available)

Our incentives department assists you with filling out any applicable paperwork and applying for eligible energy incentives.
